

Indonesia Corn Dashboard Analysis

Total Corn Production By Island

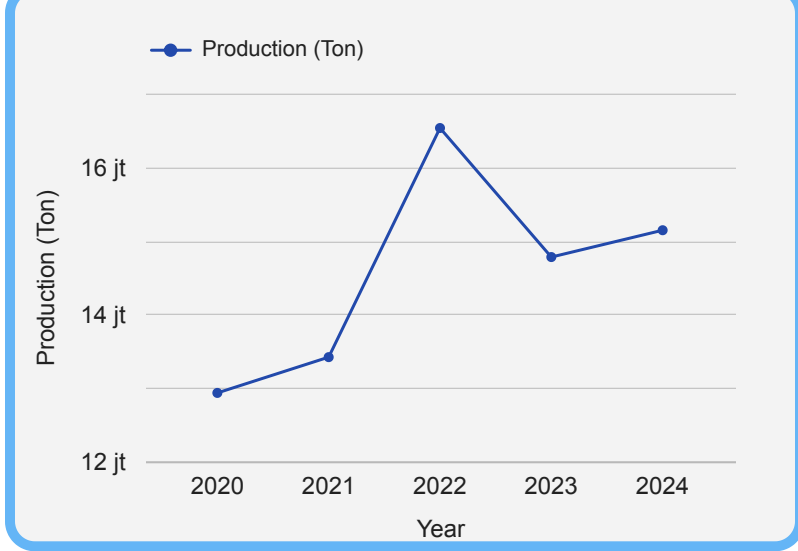

Summary

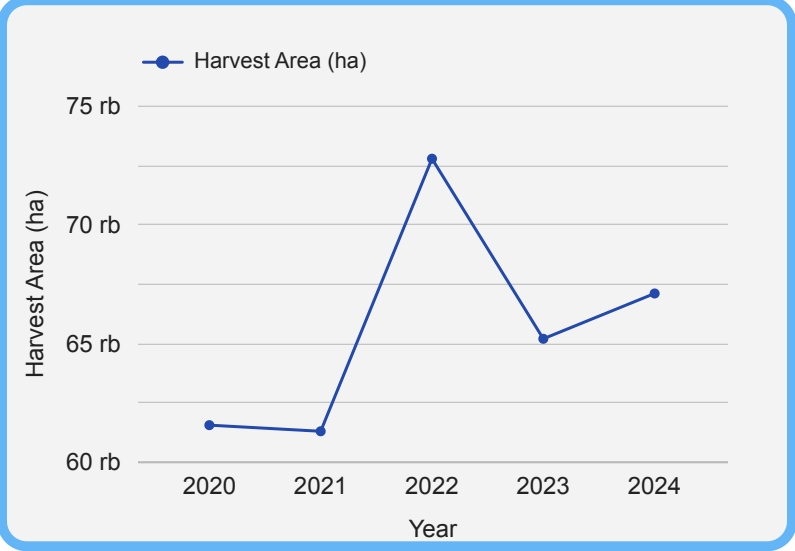

During the 2020–2024 period, corn production and land area in Indonesia fluctuated, while productivity continued to increase. Significant production increases occurred in 2021–2022, with Java Island as the highest corn producer, particularly East Java Province as the largest producing province.

Recommendation: Optimise corn production outside Java by strengthening agricultural facilities and infrastructure and maintaining stable corn prices to support sustainable production.

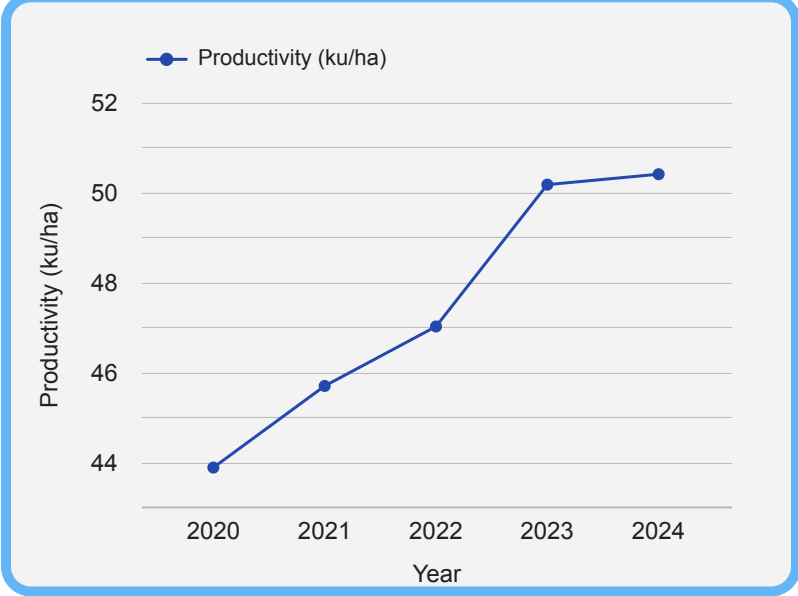

Annual Corn Production By Year
